Elise wallpaper from Milton & King's The Tailored Garden collection features a tailored stripe balanced with intricate floral detailing.

Garden Variety

Structure meets softness in the latest wallpaper and fabric collection from Milton & King (miltonandking.com), a collaboration with Chicago-based designer Kim Scodro Interiors. Entitled The Tailored Garden, the collection is inspired by classic European design in a range of patterns—florals, botanical motifs, stripes, geometrics and more—that are designed for layering in residential and commercial interiors. Each design is printed on demand, reducing waste while preserving the collection's quality. In short, it's a stylish way to help any project blossom. *by J.P. ANDERSON*
